

## HOTEL SANTA LUCÍA

The house where the Santa Lucia Hotel operates was built in 1859, by the governor of the province Don Manuel Vega Dávila. The house remained in the hands of the Vega family for more than a hundred years, and during this time its walls witnessed events and very important moments in the history of the Region. In 1999, the restoration and adaptation of the building began for the creation of the Hotel Santa Lucía, the same one that has preserved and rescued the architecture of this beautiful house as a sample of a traditional 19th century house, incorporating elements of modern comfort. without interfering with the taste of past eras.

### LOCATION

This hotel is located in a neighborhood that is practically a living museum, so it has many points of interest within walking distance. The Cathedrals of San Alfonso and the Immaculate Conception are only 200 meters from the hotel, while Mariscal Lamar Airport is 3 km away. We are located in the best area of the historical center of the city.
